

LevelOne Technology

National Provider of Network Infrastructure Solutions

Designing, Installing and Maintaining Quality Network Infrastructure Solutions.

LevelOne understands the importance and challenge of designing, implementing and successfully completing a network infrastructure project. We understand the importance of the planning, communication and documentation that keeps a successful project on schedule.

PLANNING

Every project begins with the need to evaluate and analyze customer specific current and future requirements. LevelOne project managers work with our customers to formulate the best design using the latest industry information and a wide variety of viable options. The planning stage also allows for developing timelines and milestones to ensure projects are completed within budget and time allowed.

IMPLEMENTATION

Successful implementation of a structured cabling system begins with certified installation experts. Our technicians are trained and certified through several major structured cabling manufacturers. Our experienced and knowledgeable staff ensures that your infrastructure is installed, tested, and documented according to the most recent industry standards.

MAINTENANCE

Once a project is completed, we do not consider it an end to the relationship with our customer. LevelOne will provide scheduled or on call maintenance services for your Moves, Adds and Changes (MAC). Additionally, LevelOne will cross train your in-house technicians to perform minor maintenance procedures that will not void manufacturer warranties.

SATISFACTION

Long term customer satisfaction and quality installations are the driving factor in the way LevelOne conducts business. LevelOne subscribes to the philosophy that every customer is a partner. Every installation must meet or exceed customer expectation.

LevelOne Technology

National Provider of Network Infrastructure Solutions

LevelOne Designs and Installs Technologically Advanced and Best of Class Cabling, Wireless and Switching Solutions.

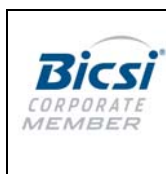

Each LevelOne structured cabling system is an end-to-end, integrated portfolio of high-performance copper and fiber cable, connectivity and cable management solution. Typically, our installations are produced by a single global manufacturer for applications ranging from the desktop to the data center.

The LevelOne products, services and cabling systems are designed and engineered to maximize the uptime of local area networks and data centers within enterprises throughout North America.

Team with LevelOne and your network will have the reliability and throughput required to support multiple generations of routers, switches and other active network gear.

Contact LevelOne today and take advantage of our network of partners to maximize your technology network.

LevelOne Partners

LEVEL 1

LevelOne Services

Inside Plant Services

- Design and Install of Copper Networks
- Design and Install of Fiber Optic Networks
- Optical Fiber Cabling and Terminating
- Wireless LAN/WAN Installation and Design
- Rack and Stack installation Services
- Independent Testing and Certifications
- Fiber Optic Fusion Splicing
- Cat5e, Cat6 and Cat6a Cabling
- Patch Panels and Termination Blocks
- Cable Tray and Raceways
- Wall-mount and Freestanding Racks
- Wireless Infrastructure
- Infrastructure Demolition/Removal
- Rack and Wire Management Systems

Outside Plant Services

- Aerial Optical Fiber/Copper Cabling
- Wireless Infrastructure and Design
- Fiber Fusion and Mechanical Splicing
- Installation of Copper Backbone Cabling
- High Pair Count Copper Cable
- Channel Banks and CSU/DSU
- Design and Install of Building Entrances

LevelOne Service Offerings

- LevelView Secure Data Storage
- Switching and Routing Solutions
- Help Desk and Support Services
- Remote Network Management Services
- VOIP Certified Solutions and Services

Why so many choose LevelOne?

- Industry Skills and Certifications
- Experience in Every Major Vertical Market
- Repeatable, Successful Implementations
- National Footprint
- Quality and Consistency
- Strategic Partnerships
- Fiscal Stability
- Long Term Support
